DETAILED ACTION

1. Claims **1 - 11** are presented for examination.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims **1 - 9**, drawn to Computer-to-computer protocol implementing -
Computer-to-computer data framing, classified in class 709, subclass 230, 236, 237.
 - II. Claims **10, 11**, drawn to Data Processing Protection Using Cryptography -
Computer instruction/address encryption, classified in class 713, subclass 189, 190.

The inventions are distinct, each from the other because of the following reasons:

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

3. Inventions in Group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if

they are shown to be separately usable. In the instant case, invention in Group I has separate utility such as Computer-to-computer protocol implementing - Computer-to-computer data framing. Invention in Group II has separate utility such as Data Processing Protection Using Cryptography - Computer instruction/address encryption. (See MPEP § 806.05(d)).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)

8. Applicant is reminded upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in

Art Unit: 2136

the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
